EDUCATION

University of Alberta

BSc in Computer Engineering, Software Option Co-op

Edmonton, AB

June 2026

WORK EXPERIENCE

WheelsCoach Inc.

Edmonton, AB

Software Engineering Intern

May 2025 – December 2025

- Architected and deployed a multi-tenant SaaS platform on AWS for 100+ users, automating dev-to-production deployments from ~30 minutes to ~1 minute using deployment scripts.
- Engineered a Java Spring Boot backend with 120+ REST endpoints powering payments, booking cancellations, notifications, package purchases, and account workflows.
- Designed a PostgreSQL architecture spanning 20+ tables with separate tenant databases and Liquibase migrations, strengthening data isolation and preventing cross-client data exposure.
- Built a React/TypeScript front end supporting 3 user roles and 20+ user flows, owning features end-to-end from business requirements through release.
- Integrated Stripe Connect to automate online payments, bookings, cancellations, and refunds, saving ~20 minutes per transaction across hundreds of monthly transactions.

Umay Care Inc.

Edmonton, AB

Software Engineering Intern

January 2024 – September 2024

- Migrated authentication for 2,000+ app users to Firebase Auth, reducing login-failure support requests to nearly zero while strengthening password and token security.
- Built real-time Shopify-to-Firebase pipelines connecting hundreds of monthly purchases with thousands of daily usage events, enabling longitudinal engagement and retention analysis.
- Analyzed 200K+ BigQuery records to develop engagement and retention metrics later used in marketing, while optimizing SQL queries to reduce runtime by approximately 50%.

Alberta Innovates

Edmonton, AB

Business Coordinator

June 2023 – September 2023

- Automated RFP document generation with VBA macros, reducing creation time by over 80% by converting project inputs into reusable templates.
- Updated WeConnect intranet pages using HTML, CSS, and JavaScript, supporting access to internal information for 1,000+ members.

PROJECT EXPERIENCE

Where Did My Money Go? – Python | scikit-learn | AWS | Streamlit

- Built a TF-IDF transaction categorization model as a serverless REST API using AWS Lambda, API Gateway, S3, CloudWatch, pytest, and GitHub Actions CI.

Eventify – Java | Firebase | Android | JUnit | Espresso

- Developed a Java Android event application with QR-code sign-ups and Google Maps, plus a reusable generic CRUD data layer and Firebase profile-image workflows.

Lab Inventory Management – Python | Codex | Spec-Kit

- Led an AI-first capstone using Codex and Spec-Kit to generate and refine application code, APIs, system specifications, and architectural artifacts with structured human review.

LEADERSHIP EXPERIENCE

Engineering Students' Society

Edmonton, AB

Vice President of Community

May 2024 – May 2025

- Led 22 volunteers across multiple portfolios and organized First-Year Engineering Orientation for 850+ students through cross-functional event coordination.

SKILLS & CERTIFICATIONS

Certification: AWS Certified Cloud Practitioner

Languages: Python, C/C++, Java, C#, Rust, JavaScript, TypeScript, Bash, PowerShell, MATLAB

Cloud & DevOps: AWS (EC2, S3, Lambda, CloudFront, ALB, IAM, CloudWatch), GCP, Azure, Docker, CI/CD, GitHub Actions

Frameworks & Data: Spring Boot, React, Node.js, REST APIs, WebSockets, JWT, Stripe, Liquibase, PostgreSQL, MySQL, SQLite, MongoDB, BigQuery, Firebase
